Datasource 2: International Student Demographics

- Data URL: International Student Demographics Dataset

- Data Type: CSV

- Author: Syed Abdul Shameer

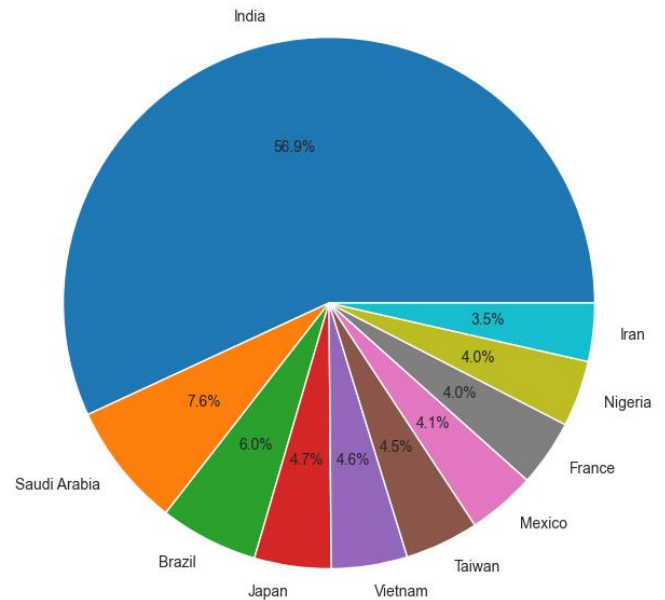

- License: CC0: Public Domain

- Origin: OpenDoorsData.org

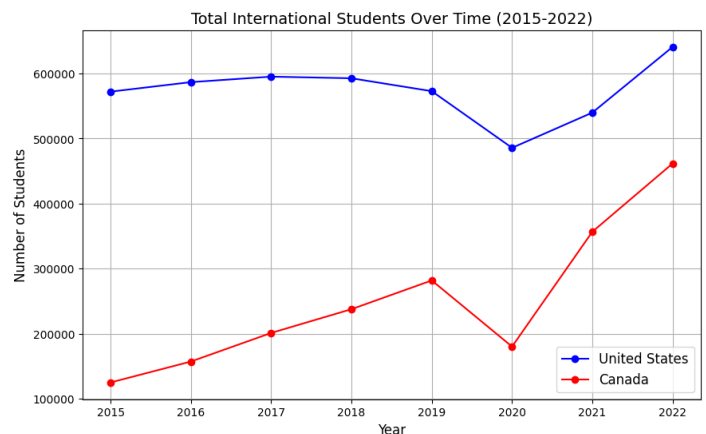

- Description: This dataset contains demographic details of international students globally. It includes data on students studying in the USA and other popular destinations, enabling comparative analysis across countries.

Analysis

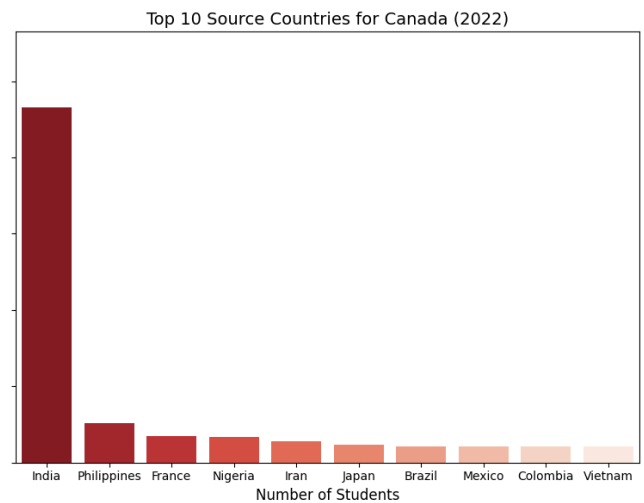

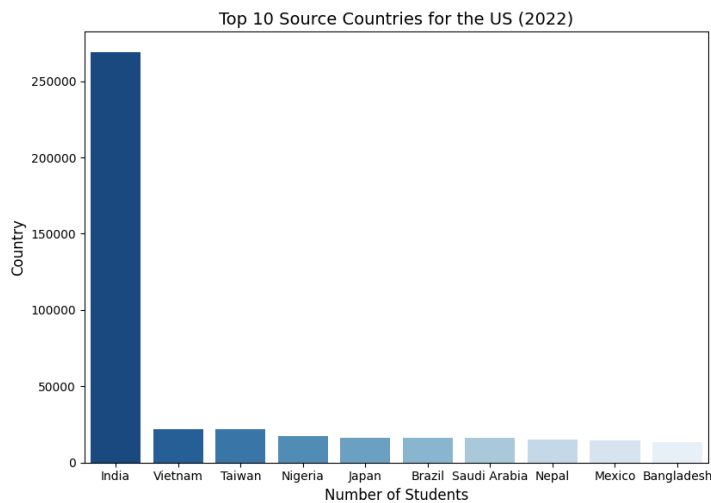

Lets start by finding top source country international students from 2015 to 2022.

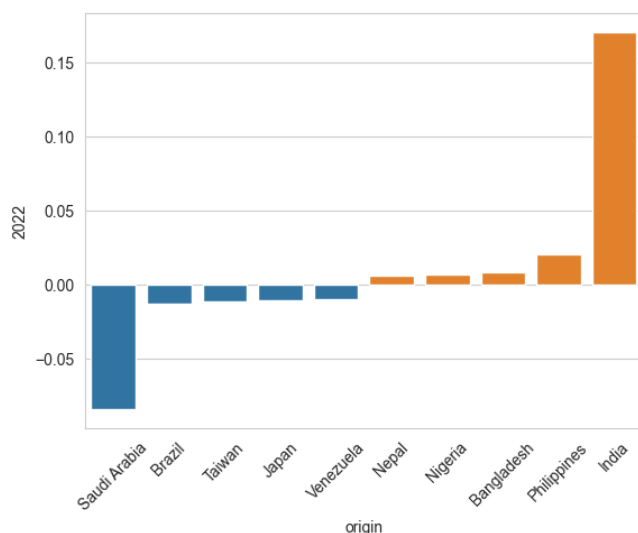

India, Saudi Arabia and Brazil are top 3 contributors during 2015-2022.

As we can see total international students are increasing but with a greater rate for Canada this indicates in recent years Canada has become a popular destination for international students.

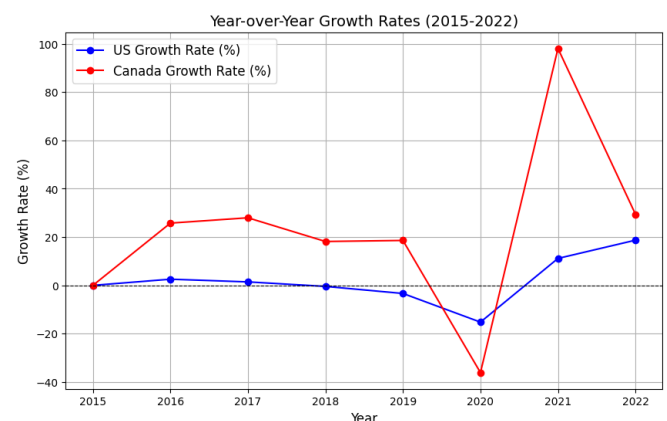

1. Trend of Total International Students Over Time (2015-2022):

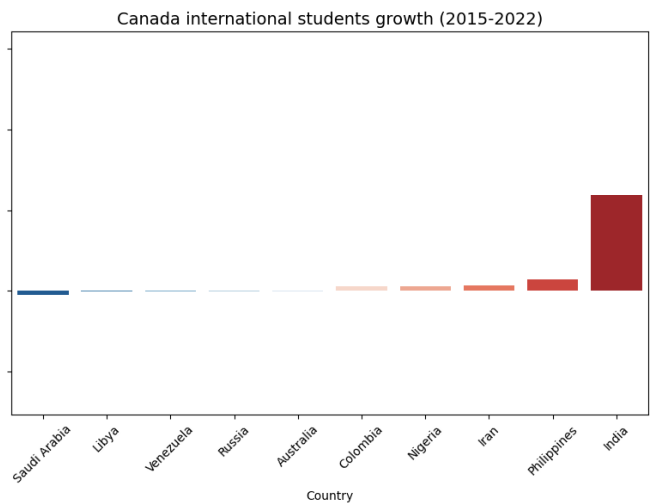

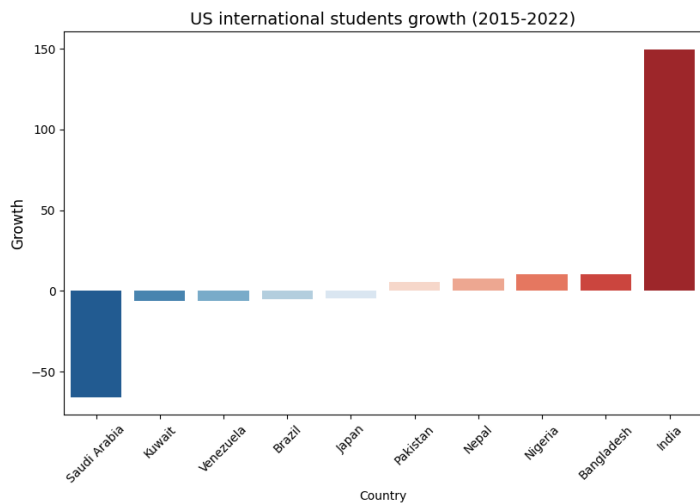

Saudi Arabia has the most decrease and India has the most increase in international student in north america.

- **United States:**
 - Total student numbers have fluctuated slightly but remain relatively stable overall.
 - A dip occurred in 2020, likely due to the COVID-19 pandemic, followed by recovery in 2021-2022.

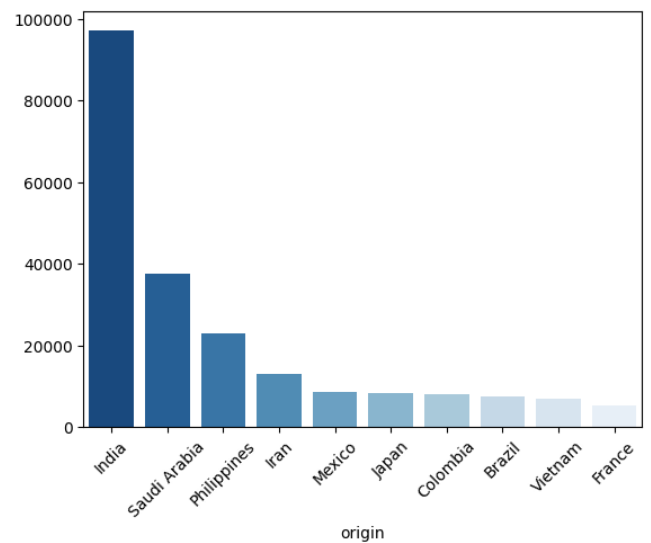

- **Canada:**
 - Steady growth over the years, with a significant increase in 2021-2022, indicating Canada's increasing appeal to international students.
- The visualizations show India's dominance in both the US and Canada.
- Other key contributors vary between the US and Canada, reflecting differences in immigration policies and educational preferences.

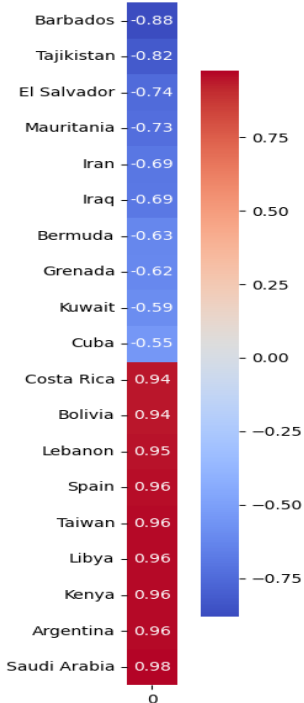

Countries with the Largest Growth (US):

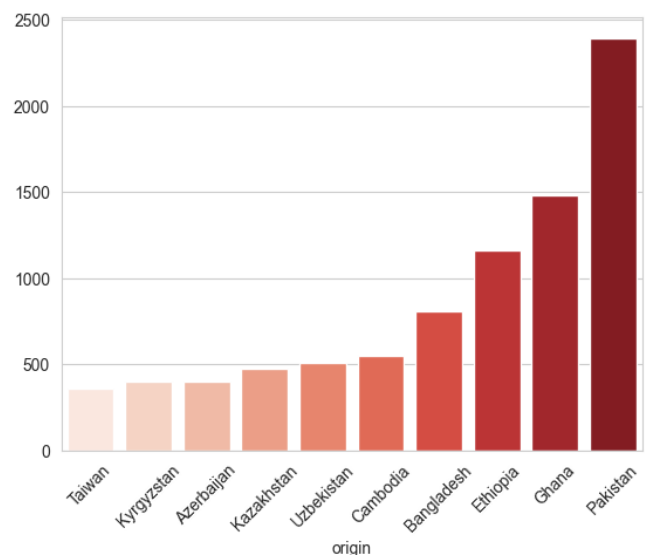

1. **India:** +103,005 students.
2. Bangladesh, Nigeria, and Nepal also saw significant increases.
- **Countries with the Largest Growth (Canada):**
3. **India:** +200,175 students.
4. The Philippines, Iran, and Nigeria experienced strong growth in student numbers.

Correlation Matrix Heatmap

Top 10 countries that Canada is becoming their main destination.

Top 10 countries the us is becoming their main destination.

Countries Switching Preferences (2015–2022):

The following countries shifted their preference from the USA to Canada:

- Barbados, Bhutan, Burundi, Colombia, Cuba, Haiti, Iran, Madagascar, Mauritania, Philippines, Sri Lanka, Ukraine.

Key Insights:

- **Saudi Arabia:** A notable decrease in students, potentially due to improved domestic education options.
- **Ukraine:** A significant rise in Canadian-bound students, likely influenced by war.
- **France:** Uniquely does not exhibit a preference for the USA during this period.

Conclusion

The analysis confirms a growing preference for Canada among students from several countries over the USA, driven by a combination of factors including policy differences, global events, and domestic conditions in source countries.
